PERSON CENTERED PRACTICES

Person Centered Practices (PCP) is about helping find and support the balance of what is important to and for a person. By listening to and taking action. This can be applied at all three levels of change.

LEVELS OF CHANGE

Level 1: Changes made personally and professionally these help create positive control in the life of people you support, and those around them. You do not need permission to make these changes – example - Person First Language

Level 2: Changes made at an organizational level (administration, human resources, CEO, Board...) these effect the lives of people supported, workforce, or administration to support positive control at a larger scale

Level 3: Changes made at the system level. These changes have an effect on many organizations, and therefore many peoples' lives. State and Federal Mandated or initiatives.
