## **Purpose**

The purpose of the Tiered Onsite Evaluation Tool (TOET) is to provide professionals with a tool for measuring fidelity of implementation at the team level for person-centered practices and positive behavior support. Fidelity of implementation is used to understand whether teams are implementing person-centered practices and positive behavior support using the key principles of those practices (Freeman et al., 2006; Rodgers, LePage, & Freeman, 2016; Smull, Bourne, Sanderson, 2009; Stirk & Sanderson, 2012; Timmons, Freeman, Benway, & Gulaid, 2016). The TOET is intended to be used within a framework of implementation science (Fixsen, Naoom, Blasé, Friedman, & Wallace, 2005). The TOET can be used to: a) improve quality of life for people receiving supports, b) encourage relationship building, c) learn and practice social and emotional wellness, d) respond to challenges using conflict resolution, empathy, and culturally responsive practices, and e) help teams to design settings where all people feel respected and experience positive recognition and feedback. The implementation of person-centered and positive behavior support practices is based on the research and technical assistance developed by positive behavioral interventions and supports (PBIS) in schools (Bradshaw, Mitchell, & Leaf, 2010; Horner, 2020; Horner et al, 2009; Sugai et al., 2005) funded by the Office of Special Education, and by research on implementation science (Fixsen, Blasé, & Van Dyke, 2019). The key features related to PBIS in schools were adapted to address the unique systems, contextual issues, and language associated with organizations who serve people receiving Home and Community-Based Services (Rodgers et al., 2016; Timmons et al., 2016).

Teams work on a continuum of strategies that address universal or Tier One strategies for promoting person-centered environments and encouraging positive social and communication skills among staff members and persons receiving services. Tier Two processes are used to monitor quality of life and social interaction patterns in order to address issues for people related to quality of life, wellness, and social interaction patterns as early as possible when challenges arise. Tier Three processes include developing the expertise internally (or via regional collaboration) including monitoring systems within organizations so that any person not

benefiting from primary or secondary tiers can access intensive positive behavior support as well as other evidence-based practices that improve quality of life. For more information about three-tiered implementation of person-centered practices and PBS, please review the references and resources at the end of this document.

The TOET fidelity of implementation measure guides teams implementing *Tier One* universal person-centered and positive behavior support (PBS) practices. Tier One strategies involve using a team-based approach to implement person-centered strategies for relationship building across settings, establish strategies for promoting positive social skill development by staff members, people supported, family or guardians, and community members, creating opportunities to recognize and celebrate positive social interactions, and establish data-based decision making. A key component of Tier One includes developing a process for monitoring quality of life and social interactions on an ongoing basis in order to identify people who would benefit from targeted, group, and/or simple individualized strategies for improving quality of life and decreasing social interaction challenges. Although the current TOET focuses on the Tier One level, future versions of the TOET will focus on monitoring fidelity at the Tier Two and Tier Three.

### **Who should use the TOET?**

While a number of human services systems can use the TOET for implementation purposes, this measure aligns best with organizations supporting people in residential and employment-based settings. However, the TOET has been used by a variety of human service organizations including:

- Organizations providing family-based supports,
- Mental health service provider organizations,
- State agencies,
- Public health organizations,

**Tiered Onsite Evaluation Tool**  
*Version- October, 2020*

- Counties, and
- County collaboratives in rural settings.

Additional guidance for adapting the TOET for use by county teams, public health, mental health, and family-based supports are currently underway.

**How was the TOET developed?**

The TOET is based on similar fidelity of implementation tools designed in PBIS research and technical assistance (Algozzine et al., 2014; Kincaid, Childs, & George, 2005; Sugai, Lewis-Palmer, Todd, & Horner, 2001) with modifications made to address the types of organizations involved. Two fidelity of implementation tools in particular were used as a guide for the design of the TOET: 1) the School-wide Evaluation Tool (Sugai, et al., 2001) and 2) the Tiered Fidelity Inventory (Algozzine et al., 2014). These PBIS measures have been evaluated for psychometric effectiveness and are widely used in PBS to measure implementation (Horner et al., 2004; McIntosh et al., 2017). The TOET is in the process of being finalized and assessed for psychometric effectiveness with assistance from experts in the field of PBS and person-centered practices as well as state, regional, and local professionals who are piloting its use.

**What is the cost and time involved to complete the TOET**

There is no cost to access this tool for evaluation. However, it is recommended that teams use the TOET with guidance from someone with experience implementing person-centered practices and positive behavior support. Completing an onsite TOET can take 2-3 hours with the organization-wide team meeting together in order to complete the interviews and review products and documents. Direct observations vary depending upon how the team decides to collect the data and how large implementation efforts are within an organization. There are a number of ways in which the team can use the TOET to guide implementation.

- 1. Annual Evaluation:** Ideally, the TOET is completed annually using a facilitator who is external to the organization. This allows organizations to complete an objective evaluation of their team’s implementation efforts. Facilitators can be recruited from other organizations within a region who are involved in similar implementation efforts, trainers may guide the

external evaluation, county, state, or others familiar with the TOET also may be recruited to assist an organization in completing an annual evaluation process. One way to decrease costs related to completing the TOET is to “trade” a facilitator with a nearby regional partner organization.

**Preparation:** The team decides who should attend the annual onsite assessment.

Although the types of people participating may vary, full team members are encouraged to actively participate. Some organizations bring the entire team together for the annual onsite TOET. Other organizations choose a subset of the full team due to resource challenges. The TOET works best when organizations provide documentation as evidence to support their efforts in particular items. For this reason, planning ahead is essential to give teams optimal time to prepare for the TOET meeting.

The following timeline is used for scheduling the TOET administration:

- **Six to eight weeks in advance of TOET administration session:** Review documentation that has been created during the year and make sure it is organized for the upcoming onsite evaluation. The team and external facilitators schedule the onsite and consider what materials need to be organized (Appendix B).
  - Meeting date, time & location: \_\_\_\_\_
  
- **One to two weeks in advance of the TOET administration session:** Confirm the date and location with attendees and remind the team to collect and submit the applicable permanent products.
  
- **One Week before TOET onsite evaluation:** Team sends the permanent products to the facilitator for review prior to TOET administration session.
  
- **One to two weeks after the TOET onsite evaluation:** Facilitator summarizes and discusses the results with the team and updates the organization’s graph showing

fidelity of implementation by subscale.

2. **Self-Assessment:** The TOET can be used as a self-assessment measure that is conducted within the organization with no external facilitator guiding the process. For instance, teams can use the TOET 2-3 times a year during regularly scheduled meetings to guide action planning. Using the TOET as an ongoing self-assessment measure throughout the year can help a team celebrate success and focus on the areas in which additional action planning is necessary. It can be helpful to recruit a team member with more experience in person-centered and PBS practices to guide the team discussion and scoring of the TOET. This option is often used with an annual evaluation process to keep the team focused and moving forward and can be especially useful in the first year of implementation.
  
3. **Tele-Administration:** Teams can complete the TOET via tele-connection technology (e.g., video conferencing) with an external evaluator or informally with a colleague from another organization to reduce travel and onsite costs. This option can help support teams located in rural areas when there aren't other organizations nearby that would allow teams to exchange facilitators. During the first TOET events, onsite support is helpful for establishing a direct observation system. When this model is used, it can be helpful to have the team prepare de-identified data and supporting evidence documents in an electronic folder (e.g., BOX, Google Drive, etc.) and put documents in sub-folders that are labeled by the TOET item number.

### **How should our team prepare for the TOET?**

TOET assessment is based on the team's ability to share evidence of Tier One implementation efforts. Examples of evidence at Tier One includes:

- Meeting agendas and meeting minutes,
- Policy and procedural documentation,
- Data collection strategies and summarized data
- Calendars for organizing training materials

**Tiered Onsite Evaluation Tool**  
*Version- October, 2020*

- Training materials, board presentations, and
- Newsletters with information related to the process.

A complete list of these examples of evidence to collect is in Appendix A. Teams collect the documentation for the TOET in an electronic folder or with a team notebook (e.g., a three-ring binder with divider tabs separated by TOET number or a shared drive with separate sub-folders labeled by TOET item number). Keeping the information up-to-date makes it easier for the team since it decreases the need to prepare later.

**How do I score the TOET?**

Scoring the TOET involves totaling the score on each item by the total number of points possible. Facilitators score the TOET and calculate the percentage from the points awarded divided by the total points possible. A scoring system including criteria tailored for each item assists the facilitator in scoring a “0” (not in place), “1” (some evidence available), and “3” (fully implementing). Teams that score above 70% on each tier may be approaching full implementation although there is no evidence yet to confirm this theory and more research is needed in this area.

**Additional data collection related to implementation**

There are two sections in the Appendix that are used to collect evidence related to implementation. Teams that have been implementing for a longer period of time are encouraged to increase the type of evidence that demonstrates Tier 1 implementation. The tools in the Appendix include the Capacity Measurement Tool (Appendix B), Direct Observation (Appendix C), and Annual Informal Interviews (Appendix D).

The goal of direct observation is to confirm there are objective Tier One changes occurring within the organization. The plan for collecting these data need to be tailored to the unique context of the human service organization. Guidance from someone with expertise is helpful since each organization needs to tailor the direct observation process. A person with experience implementing person-centered and positive behavior support practices can guide the team in

**Tiered Onsite Evaluation Tool**  
*Version- October, 2020*

identifying how to: 1) create a plan for direct observation, 2) write or adapt definitions using tools and resources available on MNPSP.ORG, and 3) share examples of how to begin using direct observation.

Universal Primary Person-Centered Practices and Positive Behavior Support

**Subscale: Team Action Planning and Stakeholder Involvement**

| Feature   | Possible Data Sources  | Scoring Criteria   |
|---|--|--|
| <p><b>1.1 Team Composition:</b><br/>Working team composition includes administration, key contact(s), universal person-centered (PC) coaches, and practice expertise, PBS expertise, human resources, management, and direct staff</p>  | <ul style="list-style-type: none"> <li>• Organizational chart or documentation</li> <li>• Meeting Minutes</li> <li>• Interviews</li> </ul>   | <p>0 = Team exists but roles are not represented</p> <p>1 = Team exists but some key team members do not attend, or attend less than 80% of the meetings</p> <p>2 = Team members representing key roles attend over 80% of meetings</p>  |
| <p><b>1.2 Team Effectiveness:</b> meets regularly and has at least four effective meeting processes that include:</p> <ul style="list-style-type: none"> <li>• Regular monthly meetings</li> <li>• Meeting minutes/agenda</li> <li>• Defined roles</li> <li>• Action plan in place</li> </ul> | <ul style="list-style-type: none"> <li>• Agendas, meeting minutes</li> <li>• Roles and people clearly documented</li> <li>• Action Plan</li> <li>• Observation</li> </ul>  | <p>0 = Team does not have the four effective meeting processes in place</p> <p>1 = Team meetings include at least two of the four effective meeting processes</p> <p>2=Team includes all four meeting processes</p>  |
| <p><b>1.3 Stakeholder Involvement:</b><br/>System in place for involving all stakeholders in the planning process (self-advocates, community members, other agency representation, family members)</p>  | <ul style="list-style-type: none"> <li>• Meeting minutes from staff and team meetings</li> <li>• Email and correspondence</li> <li>• Action Plan</li> <li>• Opinion surveys</li> <li>• Feedback loop (newsletter, annual report with public comment option)</li> </ul> | <p>0 = No evidence that stakeholders are involved</p> <p>1 = Some evidence that stakeholders are involved but in an informal manner with no formal ongoing process for involvement</p> <p>2=Formal meetings are scheduled in advance and documentation is gathered by team to use in ongoing action planning</p> |
| <p><b>1.4 Consensus Building and Staff Decision Making:</b><br/>Strategies for staff member involvement are used to build consensus and involvement (regular agenda items in staff</p>  | <ul style="list-style-type: none"> <li>• Meeting minutes from staff and team meetings</li> <li>• Results of voting documented</li> <li>• Staff meetings</li> <li>• Action Plan</li> </ul>  | <p>0 = No evidence that readiness assessment was conducted or staff members are involved beyond team</p> <p>1 = Some evidence that staff</p>   |

| <p><b>1.29 Introductory Training in Universal PBS Available for Key Stakeholders and Community Members:</b> Staff as well as other stakeholders in the community are introduced to key elements of universal practices (online trainings, presentations, group action planning)</p> | <ul style="list-style-type: none"> <li>• Presentations</li> <li>• Schedule of PBS trainings</li> <li>• Summary of people trained</li> <li>• Community outreach</li> <li>• Onboarding training</li> <li>• Formal mentoring and consultation system in place</li> <li>• PBS facilitators as coaches</li> </ul>  | <p>0 = No evidence is available to indicate that the team has organized introductory presentations for staff and other stakeholders</p> <p>1 = Some evidence is available indicating that staff and other stakeholders have an opportunity to learn about practices</p> <p>2 = There is a regular schedule or process for presenting information about universal practices to staff members and other stakeholders</p> |

## Guidance Questions for the TOET Interview

### Team Action Planning and Stakeholder Involvement

**1.1 Team Composition:** Tell us about the members that are currently on your team and who attends the meetings.

**1.2 Team Effectiveness:** Which meeting processes are in place for your team meetings?

**1.3 Stakeholder Involvement:** How do you communicate what is happening on your team with self-advocates, community members, staff, families, and others?

**1.4 Consensus Building and Staff Decision Making:** Tell us what your team has done to assess readiness and build consensus among people at your organization? (e.g., using the Person-Centered Organizational Development Tool)

### Universal Person-Centered Practices

**1.5 Organizational Alignment:** Show us your vision and mission statement. How are they aligned with person-centered values? How are your team's outcome statements aligned with these?

**1.6 Policy Alignment:** How are person-centered practices evident in your policies and procedures?

**1.7 Universal Person-Centered Strategies:** How are person-centered strategies used in your organization, and in which settings are they used? Are systems in place for mentoring or coaching staff in these practices?

**1.8 Active Staff Support:** How have you assessed staff support of person-centered practices in the area(s) where you are implementing?

### Universal Positive Behavior Support

**1.9 Organizational Policy Alignment:** Tell us about your policies and practices for building positive social environments.

**1.10 Positive Social Interactions & Skills:** Have you identified organizational values and behavioral expectations in any settings in your organization? How do you teach positive social skills, and what is your plan for expanding these skills across the organization?

**1.11 Positive Feedback and Acknowledgement:** How do you acknowledge the behaviors that you want to see in your organization?

**1.12 Consistent Response to Problems That Occur:** How do you respond to problems that occur in your organization?

### Cultural Awareness and Competence Strategies

**1.13 Active Recruitment:** Tell us about how you recruit staff, and do you use any targeted marketing strategies to hire staff from diverse backgrounds? If so, tell us about them.

**1.14 Cultural Acceptance:** How do you assess people's perceptions of cultural acceptance, and how do

you use the information you collect? In what ways do you recognize and celebrate cultural diversity?

**1.15 Cultural Awareness and Responsiveness:** What strategies or training materials do you use to increase cultural awareness and responsiveness?

### **Monitoring Plans and Organization-wide Data for Decision Making**

**1.16 Organizational Workforce:** Which tenure, retention, and staff satisfaction data about your workforce do you collect and review? What do you do with the data?

**1.17 Data-Based Decision Making:** How do the data you collect inform your team's practices?

**1.18 On-Going Monitoring of Fidelity Data:** How does your team use fidelity data? How do these influence your team's practices?

**1.19 Annual Evaluation:** Tell us about your team's practices to evaluate your progress each year. How do you share this information with people?

**1.20 Direct Observation:** How does your team use observation data? How are these data summarized?

**1.21 Universal Quality of Life Assessment:** How does your team use quality of life data? How are these data summarized?

### **Support for Staff Learning New Skills**

**1.22 Staff Development and Competency-Based Training:** What professional development opportunities are in place for your staff? How is instruction in person-centered practices and positive behavior supports included in these opportunities?

**1.23 Universal Person-Centered Strategies:** How are coaches involved in supporting learning to integrate person-centered strategies and tools into everyday routines and practices?

**1.24 Universal Person-Centered Trainers:** Can you access sufficient Person-Centered Trainers for your organization's needs? How many staff have attended universal person-centered training events?

**1.25 Coach Trainers:** Can you access sufficient Coach Trainers for your organization's needs?

**1.26 Person-Centered Planners:** Can you access sufficient Person-Centered Planners for your organization's needs?

**1.27 Positive Behavior Support Facilitation:** Can you access sufficient Positive Behavior Support Facilitators for your organization's needs?

### **Visibility**

**1.28 Celebration and Information Sharing:** How do you celebrate and share information with stakeholders? When do you do this?

**1.29 Introductory Training in Universal PBS Available for Key Stakeholders and Community**

**Tiered Onsite Evaluation Tool**  
*Version- October, 2020*

**Members:** What opportunities are there for people across the community to learn about positive support practices that your organization is implementing? What methods do you use for this, and what data do you have on who accesses/attends?

## Appendix A: Complete List of Evidence to Collect in Tier 1: Universal Practices

### Tier 1 Universal Practices: Products to Collect (consider if the items below applies to your organization's efforts)

- Your organization's vision and/or mission statement
- Policies related to person-centered practices and positive behavior support
- Team action plan
- Team meeting agendas and meeting minutes from staff and/or team meetings
- Results of consensus documentation or voting practices
- Your team's outcome statements
- Organizational chart and/or documentation of team roles, names of team members documented
- Appendix B: Team Capacity Measurement Tool
- Annual informal interviews: Evidence of implementation efforts from interviews with people receiving supports, coaches, PBS facilitators, etc.
- Evidence of team members' participation in organizational policy change workgroups or committees
- Evidence of person-centered tools being used
- Coaching and/or mentoring schedules
- Person-centered profiles from staff and/or people receiving supports (de-identified, as needed)
- Training materials used for new staff or ongoing staff development
- Your organization's matrix (positive behavior support)
- Units/departments/divisions one-page description to identify their own mission, vision and values statements. Includes everyone in the unit not just the team.
- Appendix C: Direct Universal Observation Data from Matrix Observations and Trainings (e.g., from telePBS, observations, interviews with employees and/or people served)
- Onboarding training materials and/or professional development for teaching person-centered positive support practices
- Written plans for teaching and practices positive social skills; calendar for prompting focus on specific positive support practices
- Direct support professional (DSP) position descriptions and/or supervisor position descriptions to show person-centered positive support values and practices
- Marketing and recruitment tools (indicating person-centered practices and/or cultural awareness)
- Training curricula, agendas, minutes from teaching cultural awareness and competence
- Cultural awareness and/or diversity data
- Newsletters, website, presentations, annual or quarterly reports or other communications demonstrating attempts to increase visibility
- Sharepoint, shared folder(s) or resources on tools and resources related to person-centered positive support practices
- Behavioral definitions used or evaluation measures; PBS Plans (examples, as well as number of plans created and used)
- Peer file reviews for person-centered language and/or positive supports
- Feedback loop for stakeholder engagement (e.g., newsletter, annual report with public comment option)
- Incident report data by month for the previous year since the last TOET (e.g., number of incidents per month by organization or site, number of people served by organization or site)

**Tiered Onsite Evaluation Tool**  
*Version- October, 2020*

- Organizational policies for defining incident, conflict, positive support practices and resolution strategies
- Restraint data (BIRF) for the previous year (since the last TOET)
- Quality of life data (e.g., summarized surveys, interviews, etc.)
- Retention and/or tenure data for the previous year (since the last TOET)
- Plans or practices for acknowledging and recognizing positive social interactions (employee of the month, performance reviews, recognition cards or tickets)
- Code of Conduct policies
- Sample of staff satisfaction surveys, employee engagement data
- Examples of data collected and summarized and then used for decision making
- Evidence of monitoring systems for staff development and/or summaries of training efforts
- Case/file reviews or coach observation

### Appendix B: Team Capacity Measurement Tool

How many total staff are currently employed in your organization (number of employees, not FTE)?

|   |  |
|---|--|
| Total Staff in Organization (Number of People, not FTE) |  |
|---|--|

How many staff in your organization are involved in the following roles?

Number of staff trained = The total number of staff trained since you began work in TIPPS. Include all staff who have discontinued working on your organization’s team and those who have left your organization.

Number of staff currently active on your team = The total number of staff who are currently participating in your organization’s team efforts.

|  | Number of Staff Trained | Number of staff Currently Active on Team |
|--|-------------------------|--|
| Person-Centered Coaches                |                         |  |
| Person-Centered Coach Trainers         |                         |  |
| Person-Centered Thinking Trainers      |                         |  |
| Person-Centered Planners               |                         |  |
| Key Contacts                           |                         |  |
| Positive Behavior Support Facilitators |                         |  |

How many trainers or contractors have provided these services for staff or people in your organization **since the last TOET?**

Number of trainers or contractors = People who provide these services but are not on your organization’s regular payroll (i.e., they are not a regular weekly employee in your organization).

|  | Number of trainers or contractors |
|--|-----------------------------------|
| Person-Centered Thinking Trainers        |                                   |
| Universal Person-Centered Coach Trainers |                                   |
| Person-Centered Planners                 |                                   |
| Positive Behavior Support Facilitators   |                                   |

### Appendix C: Direct Observation Tool

Date and Time of Observation: \_\_\_\_\_ Number of People in the Setting: \_\_\_\_\_

Setting Observed: \_\_\_\_\_

**Instructions:** For more information about the definitions and how to create a plan for direct observation, please visit the [Training Materials page on Organizational Evaluation](#).

#### **Part 1**

Observe up two staff while they are working or observe up to two people who are being supported using the list below.

##### **A. Promoting Social Engagement and Interactions**

| <b><u>Item Observed</u></b>                 | Minutes<br>0-5           | Minutes<br>5-10          | Minutes<br>10-15         | Minutes<br>15-20         |
|---|--------------------------|--------------------------|--------------------------|--------------------------|
| Encouraging Others to Interact              | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Supporting Choices                          | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Reinforcing Others                          | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Subtotal Person-Centered Behaviors Observed |                          |                          |                          | _____/12<br>%            |

#### **Part 2**

Observe up two staff while they are working or observe up to two people who are being supported using the list below.

##### **A. Opportunities to Participate in Positive Social Interaction**

| <b><u>Item Observed</u></b>                                | Minutes<br>0-5           | Minutes<br>5-10          | Minutes<br>10-15         | Minutes<br>15-20         |
|--|--------------------------|--------------------------|--------------------------|--------------------------|
| Active Involvement in<br>Conversations/Meetings/Activities | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Engaging in Identified social Behaviors:                   |                          |                          |                          |                          |
| Person Centered Value 1                                    | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Person Centered Value 2                                    | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Person Centered Value 3                                    | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Person Centered Value 4                                    | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Subtotal Person-Centered Behaviors Observed                |                          |                          |                          | _____/24<br>%            |

## **Appendix D: Annual Informal Interviews**

Informal interviews can be used on the day of the onsite or during a designated time period soon after to collect information from staff members and people supported. The goal of the annual informal observation is to gather evidence that Tier 1 implementation is occurring by contacting a random selection of people and asking them 2-3 simple questions.

The manner in which these data are collected need to be adjusted for the type of organization receiving services. The external evaluator will need to come up with a plan to gather information prior to the onsite visit. The goal is to randomly select staff members and people supported and interview them to better understand the impact of Tier 1 implementation.

Appropriate questions for the interview may include:

- 1) What are our values at our organization (or in this setting)?
- 2) What training have you received to date on the matrix? Have you found this helpful?
- 3) What things has our team/organization done that are person-centered?
- 4) What things has our organization done that promote a positive universal level?
- 5) How do we address quality of life?

Questions should be modified as needed to include discussions with people across the organization, including people receiving support, family members, direct support staff, supervisory staff, etc.

**Appendix E: Matrix Template**

List Person-Centered Values and Social Behaviors Identified by Organization

|                       |  | Setting |  |  |  |  |
|-----------------------|--|---------|--|--|--|--|
|                       |  |         |  |  |  |  |
| Person-Centered Value |  |         |  |  |  |  |
|                       |  |         |  |  |  |  |
|                       |  |         |  |  |  |  |
|                       |  |         |  |  |  |  |
