

INTERNATIONAL JOURNAL OF **POSITIVE BEHAVIOURAL SUPPORT**

Special issue: **PBS and Neurodiversity**

Guest editor and co-author: Linda Bambara

Professor Emerita and former Program Director of Special Education at Lehigh University, USA

Positive behaviour support is an expanding enterprise, influenced by scientific advances and perspectives about acceptable practices aimed at improving people's quality of life. The neurodiversity movement invites PBS leaders and practitioners to think deeply about how to improve PBS practices in ways that are respectful of neurodivergence and all people receiving PBS.

In this special issue a diverse group of authors discuss the concepts of neurodiversity and how to infuse neurodiversity informed practices into PBS.
